

## Code Layout, Readability and Reusability

### Assessment

| Parameter              | Status | Remarks                    | Rating |
|------------------------|--------|----------------------------|--------|
| Consistent Indentation | Yes    | PEP8 followed              | 5/5    |
| Proper File Structure  | Yes    | Modular folders            | 5/5    |
| Meaningful Naming      | Yes    | Clear variables/functions  | 5/5    |
| Comments               | Yes    | Important logic documented | 4/5    |
| Modular Design         | Yes    | Reusable services          | 5/5    |
| Error Handling         | Yes    | Exceptions handled         | 4/5    |

### Reusable Components

- Model Loader (Python)
- Predictor Service
- Flask Templates
- Static CSS Assets
- Machine Learning Model (.pkl)

### Overall Assessment

The codebase is well organized, readable, and reusable. Separation of concerns, consistent naming conventions, and modular implementation improve maintainability and future scalability.
