

Coding & Solution

Solution Summary

Project: Human Development Index (HDI) Predictor

Programming Languages: Python, HTML, CSS, JavaScript

Framework: Flask

Repository Link: <Add GitHub URL>

Key Features: Data preprocessing, EDA, ML model training, HDI prediction, Flask web interface, country-wise prediction.

Pending Features: Cloud deployment and user authentication.

Run: pip install -r requirements.txt, then python app.py

Code Quality Checklist

Criteria	Status
Modular code	Yes
Meaningful naming	Yes
Comments included	Yes
Error handling	Yes
Runs without critical errors	Yes
Version control (Git)	Yes

Additional Notes

The solution follows modular design principles with separate folders for templates, static resources, services, model files, and training notebooks, making the project maintainable and extensible.
